

Operating Temperature:

-55°C to +125°C

Operating Voltage:

200 VDC, 125 VAC 400 Hz

Peak Transient Voltage:

600 VDC (10µsec) @ +25°C.

Dielectric Strength:

400 VDC @ +25°C, 50 mA maximum charging current.

Insulation Resistance:

1500 megohms minimum with 200 VDC, 50 mA maximum charging current, @ +25 after 2 minutes.

Insertion Loss:

At -55°C to +125°C, the insertion loss will decrease a maximum of 3 dB from the +25°C value.

Military Specifications:

Meets or exceeds the applicable parameters of MIL-PRF-15733 and MIL-PRF-28861.

Housing (Hermetically Sealed):

Electro-tin-lead plated, hot solder dipped, or as specified.

Recommended Torque:

48 inch/oz. maximum.

Marking:

WEMS, part number, Federal Code identification, voltage, current and date code.

High Performance (200 VDC, 125 VAC 400 Hz Applications)

Tolerance: $\pm .010$ ($\pm .254$ mm) unless otherwise specified.

*All units supplied with internal tooth lockwasher and hex nut.

For further details see page 6.

Dimensions are inches (mm in parantheses).

1 Insertion loss measurements shall be made under full load over the frequency range of 1.0 MHz to 10 MHz. Insertion loss measurements above this frequency range under no load.

2 The insertion loss requirements between any two adjacent specified frequencies shall be that of the lower of the two frequencies in order to accommodate resonant dips.
